

# LEGRAND and PARK INN

## **LEGRAND DELIVERS INTEGRATED SOLUTIONS FOR THRISSUR'S LEADING FIVE-STAR HOTEL IN SIX MONTHS**

Radisson Hotel Group, one of India's largest international hotel operators, recently expanded its presence in Kerala with the launch of Park Inn by Radisson Thrissur—a premium five-star hotel developed by Jos Alukkas Properties. Designed by Trittech Corporation, the 66-room hotel introduces the Park Inn & Suites brand to the state, blending modern comfort with global hospitality standards.

### **Challenges**

This was the first Park Inn & Suites venture in Kerala, with plans to expand to six more locations over the next two years. The Thrissur project needed to be completed within a tight six-month schedule, demanding high standards for timely execution and integrated solutions.

### **Legrand's Solution**

Legrand delivered a comprehensive suite of integrated electrical and digital infrastructure solutions—including advanced structured cabling, sophisticated user interface systems, and robust circuit protection technologies—designed to meet the project's stringent timeline and high-performance standards. Seamless collaboration with Trittech Corporation, responsible for the electrical design, and CTL Infocom, overseeing the ELV (Extra Low Voltage) systems, was instrumental in ensuring the project's success.

### **Implementation**

Led by Trittech Corporation and executed by Powerskill Corporation, the electrical systems incorporated Legrand solutions from design to deployment. ELV components, including racks and cabling, were delivered through CTL Infocom and Modwin Networks, ensuring network readiness from day one.

Despite the project's complexity, the team achieved full electrical and ELV deployment within the scheduled window, completing installation across 66 rooms, public spaces, and service areas with zero major delays.

### **Specific Products Used**

Legrand solutions installed include:

- Arteor User Interfaces (UI)
- Miniature Circuit Breakers (MCBs) and Distribution Boards (DBs)
- Pop-up Boxes
- Moulded Case Circuit Breakers (MCCBs) and Digital Building Infrastructure (DBI)

### **Conclusion**

Park Inn by Radisson Thrissur stands as a successful first step in Radisson's Kerala expansion. Completed within the stringent six-month schedule, the project reflects strong collaboration among partners. Legrand's integrated solutions were key to timely execution, delivering a seamless, future-ready hotel experience aligned with Radisson's global standards, paving the way for seamless scale-up across India.
