

ARTEOR™ ADVANCE

FEEL SOMETHING NEW

EXPERIENCE A RANGE MADE FOR FINE LIVING

Elite

Classic

Two forms, one design concept

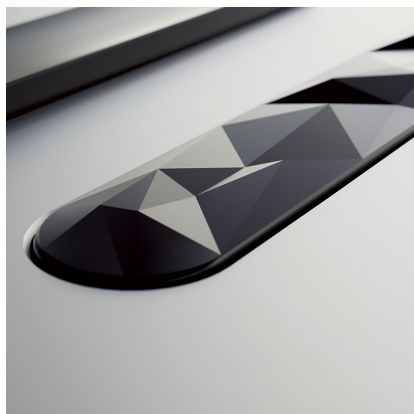

Arteor™ Advance comes in two design lines with clearly different rocker formats. The **Classic switch** gives a whole new dimension to a familiar form with a subtle and discreet aesthetic. The **Elite switch** embodies the trends of the moment with a bold design that makes a clear statement. Both rockers seem to float above the plate, light and elegant.

The iconic Elite rocker. Slim, aerial and distinctive. Perfect low angle curvature and a soft glow backlit with LEDs. Its location is immediately detectable in the dark.

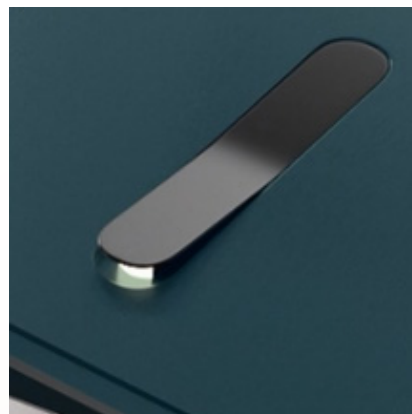

The floating rocker - a signature feature of the range.

Smart wireless batteryless switch cover. Futuristic form, optimal function.

The Legrand logo - located discreetly on the side - a sign of demanding design standards.

It's all in the details: a perfect fit and a chamfered plate.

Elegance you can feel

Every detail is deliberately pared down to emphasise the premium credentials of Arteor™ Advance. Every interaction delivers a seamless blend of elegance, tactile sophistication, and a rich, soft sound experience that reflects uncompromising standards of excellence.

Defined by versatility

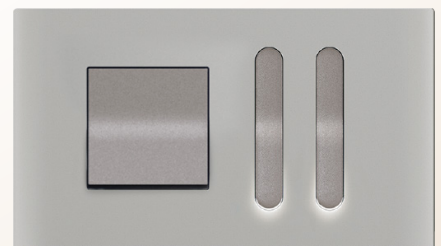

From quiet residences to the fast-paced rhythm of hospitality, Arteor™ Advance belongs everywhere refinement matters. A modern switch range designed for premium interiors across every space.

Modular design for maximum flexibility

Special hybrid plates, available in 4, 6, and 8 modules, let you combine **Classic and Elite** in one plate at the same time. This opens up more creative possibilities while keeping the look harmonious throughout.

The modular architecture lets you integrate a wide range of functions within a single plate, whatever the installation standard. Even where space is scarce, individual configurations are possible.

Full modularity for maximum flexibility

Finishes that define the space

With Arteor™ Advance, the designers have combined an attractive sense of technology with an exceptional visual style. The range lets interior designers with premium aspirations satisfy their clients' individual wishes while expressing their own unique personality.

Statement Collection

Make a quiet statement with finishes that catch the eye. Midnight Blue shifts in colour with the light, while Solid Aluminium pairs sustainable credentials with a fine, refined texture.

Decor Collection

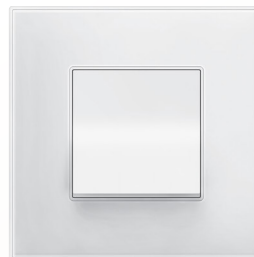

A trio of finishes that sit beautifully against modern interiors. Brushed Stainless Steel brings the cool authority of real metal, while Frosted White and Frosted Black add a soft, light-diffusing effect.

Arteor™ Advance MyHOME is a SCS bus based home automation solution designed for large residences and fully automated projects, offering easy control through manual control units, apps, touch screens, and voice assistants, along with advance DALI-2 lighting control.

Premium by design, sustainable by intent

Arteor™ Advance combines a new connected and sustainable design with premium aesthetics for modern projects. The range uses reduced material, 10% net recycled plastics, and up to 60% recycled metals to lower environmental impact without compromising quality or durability.

Arteor™ Advance with IoT also offers batteryless wireless controls powered by energy-harvesting technology, enabling flexible, maintenance-free installations ideal for hotels and commercial spaces. Certified for over 1 million operations, these patented switches deliver long-lasting performance and sustainability.
